

## NEWTON and BIGGIN PARISH VISION STATEMENT.

**The aim is to provide a simple and clear vision for a thriving and vibrant community and for its future development based on local consultation and actions.**

- To maintain and enhance the quality of life, a strong community spirit, social cohesion whilst providing a safe, vibrant and diverse community for all its residents.
- Continue to be an area where people want to live, work and socialise in with a range of services, facilities and infrastructure that meet the requirements of the community and its visitors.
- The most highly valued countryside areas in the Parish will be recognised, conserved and protected. Views and access to the surrounding countryside will be retained.
- Traffic is to be managed in such a way that ensures the safety of pedestrians, cyclists, horse riders, walkers as well as motorists. Endorse policies that ensure any potential increase in traffic volume is kept safe and efficient parameters.
- Ensuring that any new property development is planned to be beneficial to the sustainable population growth of the Parish and its amenities/facilities.
- Because of its setting there is a risk that the Parish will be encased into the wider urban development of Rugby. Our vision is to remain a clearly independent and separate settlement.
